

## Are you concerned about your child's oral health?

We are looking for **cavity free** children under 6 years of age to participate in a research project.

Participation involves the following:

- A **dental screening at no charge** to determine your child's oral health condition.
- A **test for vitamin D & iron levels at no charge** involving a blood sample from your child taken by a research nurse or doctor.
- Completion of a short questionnaire by parents.
- A small honorarium will be provided to participants.

The dental screening, blood sample and questionnaire will take place at:

Manitoba Institute of Child Health  
727 McDermot Avenue – 5<sup>th</sup> floor

For any questions or to register your participation please contact:
